**Detailed Action**

***Drawings***

The Examiner accepts the drawings filed on May 19, 2000.

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Frank Bernstein on January 12, 2009.

The application has been amended as follows:

Please amend claim 44 as follows:

A method for transacting multi-party electronic commerce over a network, comprising:

creating a plurality of atomic offers associated with a plurality of suppliers;

creating a plurality of hierarchical offers based on the plurality of atomic offers, the plurality of hierarchical offers including:

at least one first-level offer including at least a first one of the plurality of atomic offers, and

at least one second-level offer including the first-level offer and at least a second one of the plurality of atomic offers not included within the first-level offer,

creating at least one counter offer associated with a consumer;

storing the plurality of atomic offers, the plurality of hierarchical offers and the counter offer in a computer memory:

matching the counter offer to one of the plurality of hierarchical offers to create a zero-sum offer; and

closing the zero-sum offer,

wherein the first one of the plurality of atomic offers is an atomic offer for a first good or service, and the second one of the plurality of atomic offers is an atomic offer for a second good or service different from the first good or service.

***Allowable Subject Matter***

Claims 44-61 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention generally discloses facilitating an electronic commerce transaction involving multiple parties. The prior arts of record include the teaching of Pallakoff et al (US 6,269,343). Pallakoff teaches online marketing system that provides various levels of pricing for a single good wherein demand aggregation for a single good. However, the prior arts of record fail to teach, singly or in combination matching the counter offer to one of the plurality of hierarchical offers to create a zero-sum, matching counter offer corresponds to finalizing the price in relation to the offer, and closing the zero-sum offer wherein the first one of the plurality of atomic offers is an atomic offer for a first good or service, and the second one of the plurality of atomic offers is an atomic offer for a second good or service different from the first good or service.

The examiner agrees with the applicants' arguments presented in the Appeal Brief of December 14, 2006 and has withdrawn the rejection under 35 USC 102 by Pallakoff. The prior arts of records taken singly or in combination fail to teach or fairly suggest the claimed invention. Therefore, the examiner favors the allowance of claims 44-61.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
